

DrySENSE Moisture Reader

Material Moisture Level Sensor

The **PHOENIX DRYSENSE** is a Bluetooth sensor for setting and monitoring moisture goals on the jobsite. Moisture and temperature readings are automatically added to drying reports and logs the time when a drying goal is reached. For more information on the DryLINK App and DrySENSE, visit UsePhoenix.com/DryLINK/ecosystem/.

BENEFITS

- Save time taking daily readings, with data logging every six hours
- Automatically have readings added to the drying report
- Use attached pints to push DrySENSE into wet drywall
- Attach to harder surfaces using the included accessory
- Track temperature and RH
- Log the time when the drying goal was reached
- Track last known location
- Receive notifications on batter life via indicator

ADDITIONAL BENEFITS WITH DRYPHONE (OPTIONAL)

- Receive alerts in real-time when the drying goal is reached
- Access real-time drying information remotely
- Enter daily readings remotely
- Rearrange daily visits based on actual conditions

Part Number 4042055

Replacement Pins (Pack of 10) 4042037

Replacement Hard Materials Accessory 4042036

Batteries Included: 2 - AA
